

LightDM customization

Theme

In order to style the background and theme of the LightDM login screen edit the `/etc/lightdm/lightdm-gtk-greeter.conf` file as follows

```
#nano /etc/lightdm/lightdm-gtk-greeter.conf
```

```
[greeter]
background=/home/oscar/Pictures/Katwijk-Silouet-edge-grain1.jpg
theme-name=Adwaita-dark
```

Resolution

In a VM the lightDM could start with a wrong/low resolution. Add the following line to `/etc/lightdm/lightdm.conf`:

```
# nano /etc/lightdm/lightdm.conf

[Seat:*]
display-setup-script=xrandr -s 1920x1080
#type=xlocal
```
